PROFILE

I am an experienced backend developer with 2.10 years of experience in developing and maintaining high-performance systems. My goal is to embrace new challenges while leveraging my interpersonal skills to contribute to both the growth of the organization and my career in this innovative field.

EMPLOYMENT HISTORY

BACKEND DEVELOPER AT NEXT BIG TECHNOLOGY PVT. LTD., JAIPUR (FEB. 2023-PRESENT)

- Managed development milestones from initial steps through final delivery.
- Consulted with engineering team members to determine system loads and develop improvement plans.
- Reviewed code, debugged problems and corrected issues.
- Owned more than 3 projects year from initial research and conceptual design through testing and implementation phases.
- Designed and executed security measures such as firewalls and encryption.
- Planned and engineered RESTful web services to manipulate dynamic datasets.
- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns

PROJECTS

• TOPEX PRO (May 2025 – July 2025)

I independently designed and developed a trading and investment platform similar to Groww, enabling users to invest in stocks. I was solely responsible for the end-to-end development, including system architecture, backend services, database design, and frontend integration. Key focus areas included ensuring secure transactions, real-time data processing, user-friendly interface, and compliance-ready architecture.

Key responsibilities include:

- Implementing Radius, Horizon, Queue, Cron Job and Restful Api
- Optimizing platform performance and resolving technical challenges.

• APHRODITE COLLECTION (April 2023 – Nov 2025)

- Leading backend development for the Aphrodite Collection web application
- Implementing multi-user authentication and real-time messaging features
- Integrating Bit coin payment gateway for crypto currency transactions
- Utilizing Laravel for backend development and managing REST APIs
- Incorporating JavaScript for frontend functionality
- Managing Cron jobs to ensure optimal performance and reliability

• IBC TELECOM (Feb 2023 – July 2023)

- Developed and maintained an online recharge platform for IBC Telecom using Laravel, enhancing the overall system performance and scalability.
- Designed and implemented RESTful APIs to support core application functionalities, ensuring seamless integration with front-end components and third-party services.
- Utilized Swagger for API documentation, improving collaboration between backend and frontend teams and ensuring clear API response structures.
- Collaborated closely with cross-functional teams including designers, QA, and project Managers to deliver features on time and meet business objectives.
